Problem Statement:

Python program to convert time from 12 hour to 24 hour format.

```
def convert24(str1):

        if str1[-2:] == "AM" and str1[:2] == "12":

                return "00" + str1[2:-2]

        elif str1[-2:] == "PM" and str1[:2] == "12":

                return str1[:-2]

        else:

                return str(int(str1[:2]) +12)+ str1[2:8]

print(convert24("08:05:45 PM"))
```

OUTPUT:

20:05:45
