Problem Statement:

Python program to check whether a string is palindrome or not

my_str='aIbohPhoBiA'

my_str=my_str.caefold()

rev_str=reversed(my_str)

if list(my_str)==list(rev_str):

      print("The string is a palindrome")

else:

      print("The string is not a palindrome")

OUTPUT:

The string is a palindrome
