Problem Statement:

Python program to split the array and add the first part to the end

```python
def splitArr(arr,n,k):

        for i in range(0,k):

                x=arr[0]

                for j in range(0,n-1):

                        arr[j]=arr[j+1]

                arr[n-1]=x

arr=[12,10,5,6,52,36]

n=len(arr)

position=2

splitArr(arr,n,position)

for i in range(0,n):

        print(arr[i],end=' ')
```

OUTPUT:

5 6 52 36 12 10
