**Problem Statement:**

Python program to convert decimal to binary, octal and hexadecimal

```
dec=int(input("Enter a decimal number:"))

print(bin(dec),"in binary")

print(oct(dec),"in octal")

print(hex(dec),"in hexadecimal")
```

**OUTPUT:**

Enter a decimal number:26

0b11010 in binary

0o32 in octal

0x1a in hexadecimal
